

FAMILY LECTURE SERIES

FREE

Ages 7 to 14

The 4th Saturday of each month

January 28, 2023 - "Alice's Adventures in School? What Alice in Wonderland teaches us about education" by Dr. Emily Scherzinger

What can the Mad Hatter and the March Hare teach us about school? Together we will explore the silliness of nonsense literature, and what it tells us about making learning fun.

February 25, 2023 - "The Magic of Exercise" by Dr. Joyce Obeid

Exercise is good for your heart and muscles, exercise can even help you do better in school! Together we will explore the magical world of exercise for your body and mind.

March 25, 2023 - "The McMaster EcoCAR Challenge - The Key to the Future of our Planet" by Julian Lombardi and Samuel Khyzm

McMaster University is participating in the EcoCAR EV Challenge, a four-year competition. Together we will explore how the McMaster EcoCAR team hopes to build the next generation of engineers and address the future of mobility.

April 29, 2023 - "Dancing Shadows: How to Discover a New Planet Beyond our Solar System" Dr. Ryan Cloutier

Did you know some planets are so hot that they rain iron? Together we will explore how astronomers discover new planets and dive into some of these strange worlds that fill our galaxy!

May 27, 2023 - "Innovator Pannel"

Planning in progress!
