

## September 24, 2022 - "Reaching Your Full Potential" by Stephen Paquette

Stephen Paquette was born John Kimewon, a survivor of the 60s scoop. His story of strength and resiliency in facing oppression and racism is his gift to share in order to inspire others to reach their full potential.

## October 29, 2022 - "Dances of the Cure-ibbean against Cancer" by Dr. Juliet Daniel

Dancing is good for us mentally and physically. But how can dancing "treat" cancer? We will explore how the gene "Kaiso", named after the Caribbean "calypso" music, may be the key to developing new therapies to treat aggressive cancers.

## November 26, 2022 - "The Secret World of Bats" by Dr. Paul Faure and Dr. Kazuma Hase

Professor Paul Faure studies bioacoustics, hearing, and the integrative physiology of bats. Together we will explore the relationship between sound production and hearing in bats, insects and other animals.

## January 28, 2023 - "Alice's Adventures in School? What Alice in Wonderland teaches us about education" by Dr. Emily Scherzinger

What can the Mad Hatter and the March Hare teach us about school? Together we will explore the silliness of nonsense literature, and what it tells us about making learning fun.
